Examining essential life questions

This "thought path" is composed of a series of stations in Vitznau, Weggis, and Greppen that raise various topics and questions regarding the essence and meaning of life, inspiring thought and reflection through walking. Embedded in a context of nature and views, the stations along the path stimulate contemplation, inviting walkers to plunge into a realm of depth and breadth and to open to new horizons.

In addition to the on-site prompts for meditation, other activities and information can be called up on the smartphone via QR code.
